

## COMPANY QUALITY POLICY STATEMENT

I, Uwe Wischnewski and ASW Engineering are committed to total quality assurance and will ensure that our products i.e. industrial pumps, vacuum pumps, lubrication and hydraulics, water treatment and spares supplied are of consistent quality and conform fully to customer needs and expectations and statutory requirements.

In order to ensure that the future success and growth of this company is achieved on a planned basis, I have decided to implement and maintain our quality management system, based on the requirements of the International Standard ISO (International Standards Organisation) 9001:2008.

The Management committee and I will effectively review the policy and objectives thereby ensuring continued suitability for our business needs and continuous improvements.

The policies and objectives of this company and the importance of each member towards the ongoing success of ASW Engineering will be communicated to all staff as part of the training programme.

This Quality Management System is a living document and will be updated and amended according to a planned schedule within the parameters of the International Standard ISO 9001:2005 in order to improve our production, quality control, and services to customers.

I and all employees of ASW Engineering are hereby committed to understand, observe and abide by the contents of this Quality Assurance Manual and ensure that it is maintained and continuously improved at all the levels in ASW Engineering.
